an online questionnaire. According to client's answers on the aforesaid questionnaire, the Company can identify his knowledge and experience and therefore can provide the suitable leverage ratio for each client separately, and as per the latest guidelines of European Securities and Markets Authority (ESMA) dated on 1st of August 2018 as below:

The new measures have changed the existing settings of retail clients' accounts regarding margin and leverage, as follows:

- 30:1 for major currency pairs
- 20:1 for non-major currency pairs, gold and major indices
- 10:1 for commodities other than gold and non-major equity indices;
- 5:1 for individual equities and other reference values;
- 2:1 for cryptocurrencies;
- A margin close out rule on a per account basis. This standardises the percentage of margin (at 50% of minimum required margin) at which providers are required to close out one or more retail client's open CFDs;
- Negative balance protection on a per account basis. This provides an overall guaranteed limit on retail client losses; this means that their account balance will never be allowed to go below zero, regardless of market conditions.
- A restriction on the incentives offered to trade CFDs.
- A standardized risk warning, including the percentage of losses on a CFD provider's retail investor accounts.

Furthermore, through the questionnaire the Company can also identify client's economic profile, in order to prevent any money laundering and terrorist financing matters.
